*At Arbiton, every floor is created at the intersection of advanced technology, award-winning design and continuous innovation.*

*We develop flooring solutions that not only meet today's expectations, but are designed to perform reliably for years to come.*

Technology  
Design  
Innovation

3

Our technologies ensure exceptional stability, durability and comfort of use. Our design combines authentic materials, refined details and timeless aesthetics. Our innovations focus on real-life needs — easier installation, acoustic comfort and complete flooring systems that work seamlessly together.

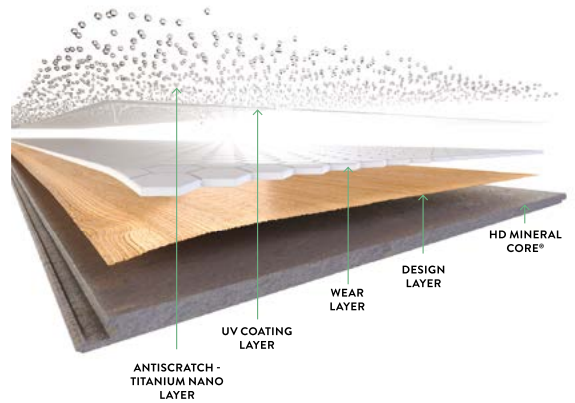

*This is flooring engineered for modern living.*

### HD MINERAL CORE®

Through innovative research in our laboratories, we have engineered the HD Mineral Core® — a state-of-the-art blend of natural rock minerals and advanced polymers. This precision-engineered core delivers outstanding performance, exceptional durability and long-term dimensional stability. The HD Mineral Core® is free from phthalates and plasticizers, reflecting our commitment to quality, safety and responsible manufacturing.

*At Arbiton, advanced technology is built into every layer. We engineer our floors to deliver reliable performance in real-life conditions—strong, stable and ready for everyday use. From the core construction to moisture resistance and thermal comfort, every solution is designed to keep its shape, look great and perform for years to come.*

Advanced  
technology

### THE PERFECT FLOOR FOR UNDERFLOOR HEATING

With very low thermal resistance, our floors ensure highly efficient heat transfer, making them an excellent choice for underfloor heating systems. Thanks to the innovative HD Mineral Core®, less energy is required to achieve optimal indoor comfort. Efficient heating starts with the right flooring — a solution designed for performance and sustainability.

### DIMENSIONALLY STABLE FLOORING

Our floors are designed to maintain their shape and integrity year after year, even under intensive daily use. Exceptional dimensional stability helps prevent gaps and buckling, ensuring a seamless and long-lasting appearance.

Choose a flooring solution engineered for durability and everyday reliability.

### 100% WATERPROOF

Arbiton floors are 100% waterproof, providing reliable protection against moisture and spills. This makes them suitable for kitchens, hallways and other high-traffic areas where durability and resistance are essential — without compromising on design.

# Award-Winning *Design*

reddot winner 2024

reddot winner 2025

*Our commitment to design excellence has been recognised with prestigious international awards, including the Red Dot Award and the iF Design Award. These distinctions confirm our ability to combine advanced technology with refined aesthetics and functional beauty.*

# Inspiring *design*

### **DECOBEVEL – REFINED EDGE DETAIL**

The Decobevel technology enhances the authentic appearance of wooden floors by subtly highlighting the edges of each plank. This refined detail adds depth, structure and elegance, emphasising the natural character of the floor.

### **REAL WOOD STRUCTURE**

Inspired by natural materials, our floors faithfully recreate the look and feel of real wood. Carefully designed textures, natural colour variations and realistic surface structures create a warm, timeless aesthetic suited to both modern and classic interiors.

### **DESIGN THAT WORKS IN REAL LIFE**

Beautiful design should also be practical. Arbiton floors are created to maintain their appearance over time, combining visual sophistication with everyday durability and ease of use.

*At Arbiton, innovation means moving forward with purpose. We continuously refine our materials, structures and production processes to make flooring smarter, more durable and more comfortable in everyday use. By listening to real needs and anticipating new trends, we create solutions that go beyond today's standards—and stay relevant for years to come.*

## Smart Innovation

### FLOOR TO WALL CONCEPT

*The Floor to Wall Concept transforms flooring into a complete interior design solution. By extending the same decors and textures from the floor onto the walls, Arbiton enables the creation of harmonious, visually consistent spaces.*

This innovative approach allows seamless transitions between horizontal and vertical surfaces, enhancing architectural clarity and spatial flow. The result is a cohesive interior concept that elevates both residential and commercial environments.

### ANTISCRATCH TITANIUM NANO-LAYER

The AntiScratch Titanium Nano-layer reflects Arbiton's commitment to long-lasting performance. This advanced protective coating reinforces the surface structure using Titanium Nano technology, delivering exceptional resistance to scratches and wear. As a result, the floor is up to 30% more scratch-resistant than standard vinyl panels, helping it maintain its original look even in high-traffic, everyday spaces.

# SHAPEMATCH

*The ShapeMatch® Concept is built around consistency and creative freedom. It allows a single colour to flow seamlessly across different flooring formats, creating a harmonious and visually balanced interior.*

*The concept includes 8 carefully selected decors, available across three distinct formats. By maintaining the same colour palette, surface texture and design details, ShapeMatch® makes it possible to combine multiple patterns without disrupting the overall aesthetic. This approach supports modern interior design, where continuity and clarity define timeless spaces.*

Design without  
*boundaries*

## *One color* three patterns

### **WOOD**

*Classic long planks form a calm and elegant foundation for the interior.*

Amaron Wood collection highlights natural proportions and understated design, providing a timeless base that adapts effortlessly to a wide range of styles.

### **HERRINGBONE**

*A dynamic and refined pattern that introduces rhythm and architectural character.*

Amaron Herringbone enhances visual interest while remaining perfectly aligned with the same colour and surface finish as other ShapeMatch® formats.

### **CHEVRON**

*Defined by bold geometry and a strong sense of direction, Amaron Chevron creates a striking design statement.*

Its expressive layout adds depth and structure, seamlessly connected to the same cohesive design language.

*Different spaces require different solutions. That's why Arbiton offers three professional installation systems, designed to meet diverse technical, functional and design needs.*

*Each method provides reliable performance, long-term durability and compatibility with our flooring collections — allowing you to choose the right solution for every interior.*

*One design.  
Three ways  
to install*

3

### **CLICK**

*Fast, clean and intuitive installation without adhesives.*

Click systems ensure strong and precise connections, making installation efficient. For optimal performance, choose an underlay tailored to your specific needs—improving comfort, sound reduction and stability depending on the room and subfloor.

### **ACULAY® Integrated Acoustic Layer**

*An innovative solution with an integrated acoustic layer, eliminating the need for additional underlay.*

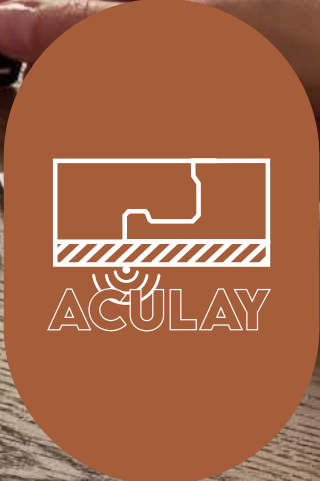

Aculay® delivers improved sound comfort while maintaining installation simplicity and excellent floor durability.

### **DRYBACK**

*A glue-down solution designed for maximum stability and durability.*

Dryback flooring is ideal for high-traffic areas and commercial spaces, offering precise installation and long-lasting performance.

*Choose the installation  
that fits your project*

*Precision. Strength. Reliability.*

*Arbiton click systems are engineered to ensure fast installation, strong connections and long-term stability. Each solution is designed to meet specific technical and functional requirements, while maintaining ease of use and precision fit.*

## Click installation systems

### **5G Cross**

*Designed to allow installation in a cross pattern, similar to traditional ceramic tiles.*

5G Cross enables planks to be locked both lengthwise and crosswise, offering greater freedom in layout design and precise installation, even in more complex arrangements.

*A proven and reliable locking system designed for efficient installation.*

The 2G system offers secure plank connections and consistent performance, making it a trusted solution for residential applications.

**5G**  
Licensed by  
Valinge

*An advanced locking system with vertical locking for fast and precise installation.*

5G ensures strong joint integrity and improved installation comfort, even on larger surfaces.

**5G**  
Licensed by  
Valinge

*Enhanced locking performance with integrated technology for greater joint stability.*

The 5Gi system provides increased resistance to separation, ensuring long-lasting floor performance.

*Acoustic comfort is an essential element of modern interiors. Arbiton acoustic flooring solutions are designed to reduce impact sound while maintaining stability, durability and everyday comfort.*

## Acoustic comfort

# Silence built into the floor

## Effective Sound Reduction

*Aculay is designed to reduce impact sound and noise within the room, creating a calmer and more comfortable living environment.*

With sound reduction values of up to 21 dB ( $\Delta L_w$ ), it delivers a clearly noticeable improvement in everyday acoustic comfort.

## Award-Winning Technology

The innovative Aculay acoustic solution has been recognised with prestigious international awards, including the Red Dot Design Award and the iF Design Award.

These distinctions confirm the successful combination of performance, engineering and design.

## Engineered for Comfort

The specially designed structure of the Aculay® layer supports floor flexibility and helps disperse sound waves, improving both room acoustics and walking comfort.

## 100% recyclable

Made to last — and made to come back. Unlike many acoustic floors that must be taken apart before recycling, Aculay is 100% recyclable as one complete system. No peeling off the acoustic layer, no sorting, no extra waste — just a smarter end-of-life that supports a more circular way of building.

reddot winner 2025

reddot winner 2024

*Maximum Stability. Professional Performance.*  
*Dryback flooring is a glue-down solution designed for interiors where precision, durability and long-term stability are essential. It is the preferred choice for demanding residential and commercial applications.*

## Dryback flooring

### **Designed for Intensive Traffic**

*Dryback floors are engineered to withstand heavy daily use, making them suitable for high-traffic residential areas as well as commercial spaces.*

Durability and surface resistance ensure reliable performance in demanding environments.

### **Slip Resistance R10**

*With a slip resistance rating of R10, Dryback flooring provides enhanced safety in everyday use.*

This makes it an ideal solution for spaces where secure footing is required, without compromising on design.

*Arbiton offers a wide range of flooring collections designed to meet different functional, aesthetic and technical requirements. Whether the project calls for natural elegance, architectural rhythm or expressive geometry, Arbiton collections provide consistent quality and versatility across formats and installation systems.*

## Find the Collection That Fits Your Space

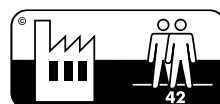

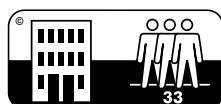

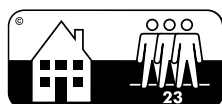

*Discover the Arbiton flooring collections and explore a wide range of styles, formats and design concepts. Choose from Amaron Superiore, featuring extra-long 2.18-metre planks, among the longest available on the market, or Forma, whose distinctive design is inspired by the look of ceramic tiles. Each collection offers its own character, while maintaining the quality, performance and aesthetic consistency that define Arbiton floors.*

*A floor is more than just a surface. It is part of a complete interior system that influences comfort, acoustics and visual consistency.  
The Complete Flooring Concept brings together floors, skirtings and underlays designed to work seamlessly as one.*

## *Complete flooring concept*

# 3

### **Floors**

Arbiton floors combine advanced technology with refined design, offering solutions for different interiors, installation methods and performance requirements. A wide range of formats, decors and structures allows for consistent design across the entire space.

### **Skirtings and Profiles**

Skirtings complete the floor visually and functionally. Carefully designed profiles and finishes ensure a clean transition between floor and wall, enhancing the overall aesthetic of the interior.

### **Underlays**

Underlays play a key role in comfort and performance. Properly selected solutions support acoustics, stability and everyday usability, contributing to long-lasting floor performance.

*Designed*  
to work together

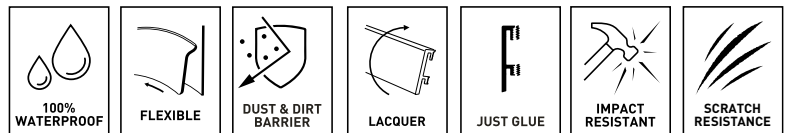

Universal  
accessories

*FORTINO is made for real life: it is waterproof, dust-resistant, and highly durable. The high-density polymer-mineral core provides strong impact resistance, while the protective coatings help prevent scratches and keep the skirting board looking new for longer.*

# ENERGY SAVING FLOORING SYSTEM

1

2

3

STEP 1

Vapour barrier foil (SD150m) protects against moisture and features a system of adhesive tapes that secure against movement of the underlay

STEP 2

It enhances heating efficiency due to its high thermal insulation parameter; high compressive strength CS=500 kPa allows for the use of click vinyl, and thanks to its 5 mm thickness, it's possible to conceal cables connecting the heating films.

STEP 3

Protects the heating film from mechanical damage thanks to the soft non-woven fabric, additionally secures the system against moisture penetration from above. Easy connection due to the integrated tape.

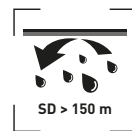

THE TOTAL THICKNESS OF THE **COMPLETE SYSTEM** IS 10 MM (including floor).
